

The Solution for PC Access to AS/400

With the HOBLink AS/400 edition, HOB offers you a unique performance package which enables PCs to access IBM AS/400 systems. Comfortable and secure access to numerous files is possible from your PC with this fully integrated package.

- ▶ HOBLink 5250
Terminal-Emulation, convinces with user friendly performance
- ▶ HOBLink DRDA
ODBC-access to DB2/400-files and OS/400 Data bank files
- ▶ HOBLink Distribution
Tool for quicker and easier software distribution in networks
- ▶ HOBLink SNA Stack
Network connections over APPC/APPN
- ▶ HOBLink AFTP Client
quicker file transfer
- ▶ HOBLink NFS Client
accesses the file-system of the AS/400

HOBLink DRDA

This performance ODBC driver makes it possible for Windows programs to access DB2 data

HOBLink AS/400 Edition – the Complete Package for perfect integration of AS/400 systems and Windows PCs

banks. In addition you can utilize every ODBC capable application on the PC for example Word, Excel or Access. The central files can then be updated and worked on in the familiar PC environment.

HOBLink 5250

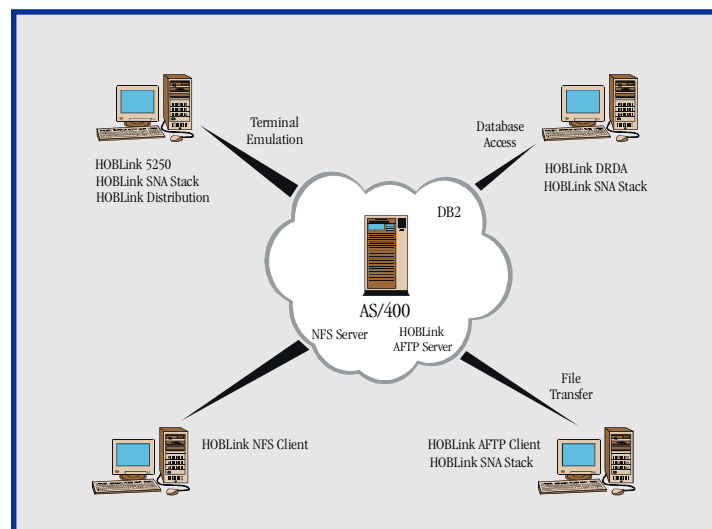

HOBLink 5250 is much more than just a 5250 emulation for PCs. With this tool you can react flexibly to numerous tasks. The comfortable macro function simplifies and accelerates constantly recurring tasks. It offers numerous possibilities, to each individual user, to adapt their work environment to their own wishes.

Multi-Session Batch Editor

This practical tool gives you the possibility to enter all sessions you wish to work with, at one stroke, thus avoiding lengthy start procedures for individual applications. The Multi-Session Batch Editor can then be used to start any other programs, which need to be used.

Quick Control per task bar-Symbol

The Windows task bar lets you set up a symbol so sessions can be quickly and comfortably controlled.

HOBLink AS/400 Edition 99!

What it can do. What it can be used for.

HOBLink SNA Stack

This performance package comprises the HOBLink SNA Stack that positions the Low Entry Node – and End Node functionality for accessing applications, which employ the APPC-interface.

HOBLink NFS Client

The HOBLink NFS Client offers you a simple access to the AS/400 file system over the network. You can then administer your files from the AS/400 in Windows Explorer.

HOBLink AFTP Client

The HOBLink AFTP Client offers you quick file transfer between the PC and the AS/400. The network connection is possible over APPC/SNA/APPN and TCP/IP (Any Net APPC over TCP/IP) The service follows alternatively “Explorer-like” or in Batch modus

HOBLink Software Distribution

The installation of HOBLink 3270, HOBLink VT525 and HOBLink X11 is possible without any input required from the workstations. The secret: the system administrator determines the settings for individual users or groups of users, within the software's distribution program. The process is completed by the user with a few mouse clicks.

HOBLink AS/400 Edition at a Glance
