

Installation of HOBLink JWT on MAC OS X (Mac OS X 10.0 or up)

There are two ways to download/install HOBLink JWT for Mac OS X from the HOBLink JWT Download HTML page.

If you are downloading/installing on a Mac, just click on the button “Start Installer for Mac OS X” on the HOBLink JWT Download HTML page and follow the instructions as they appear.

Another possibility, which can be carried out from a computer using either Windows or Mac, is to proceed as follows:

1. In the line “Mac OS X” under “Platform” on the HTML installation page for HOBLink JWT, click on the “Download” link.
2. After downloading, double-click the “install” file.
3. The compressed installer should be recognized by Stuffit Expander and should be expanded automatically after downloading. If it is not expanded automatically, you can expand it manually using [Stuffit Expander 6.0](#) or up.
